

# MARKET/PLACE

## Exploring Spaces of Exchange

*Edited by Christian Berndt, Jamie Peck & Norma Rantisi*

Part of the ECONOMIC TRANSFORMATIONS series

*Hardback, £65 / \$95, 978-1-78821-126-0, Ebook available*

Markets are seemingly omnipresent features of our economic landscape, and yet they do not exhibit a singular, essential or universal form. From a variety of disciplinary perspectives, this stimulating collection of original essays probes the question of how to think about markets spatially, and how to make sense of the geographies of marketization. Opening new frontiers for the emergent field of critical market studies, the book problematizes the “geography of markets” as an issue not only for self-identifying economic geographers, but as a demanding, interdisciplinary question.
